ABSTRACT

A method and apparatus for cleaning the slider air bearing surface of a head gimbal assembly is disclosed. A plurality of carriers may position and hold a plurality of head gimbal assemblies to be polished. A cloth strip may be rubbed against the slider air surface. A movable cylinder unit coupled to the plurality of carriers may move the carriers. A polish tank may provide cleaning solution to the movable cylinder unit. A pump may recirculate the cleaning solution. A filter canister with a filter cartridge may filter the cleaning solution.
